COTTON VARIETIES PLANTED

1997 CROP

UNITED STATES DEPARTMENT OF AGRICULTURE
Agricultural Marketing Service - Cotton Division
Memphis, Tennessee

July 1997

Cotton Varieties Planted, United States
1997 Crop

Deltapine brand upland cottonseed was the most popular planted in the United States for the 1997-98 season, according to the Cotton Division, Agricultural Marketing Service, USDA. Paymaster brand was the second most popular followed by Stoneville, Sure-Grow, CPCSD, All-Tex and Tamcot. Transgenic varieties accounted for about 23 percent of plantings.

Deltapine brand varieties were the most popular planted in 1997, accounting for 41.4 percent of the United States acreage. This brand accounted for 72.9 percent of the acreage planted in the southeastern states (Alabama, Florida, Georgia, North Carolina, South Carolina and Virginia). It accounted for 48.4 percent of the acreage planted in the south central states (Arkansas, Louisiana, Mississippi, Missouri and Tennessee), 20.5 percent of the acreage planted in the southwestern states (Oklahoma and Texas) and 24.7 percent in the western states (Arizona, California and New Mexico). Deltapine's most popular variety was Deltapine NuCotn 33B. This variety accounted for 12.7 percent of the United States acreage planted. The second most popular Deltapine variety was Deltapine 51 which accounted for 4.9 percent of the U.S. acreage.

Paymaster brand varieties were the second most popular planted in 1997, accounting for 24.6 percent of the United States acreage. These varieties accounted for 56.8 percent of the acreage planted in the southwestern states, 8.2 percent in the south central states and 2.4 percent in the southeastern states. The most popular Paymaster variety was Paymaster HS 26, accounting for 12.7 percent of the U.S. acreage followed by Paymaster HS 200 with 5.6 percent of the acreage.

Stoneville varieties were the third most popular planted in 1997. These varieties accounted for 11.3 percent of the acreage planted. They accounted for 10.5 percent of the acreage planted in the southeastern states, 27.6 percent of the acreage in the south central states, 3.2 percent in the southwestern states and 0.7 percent in the western states. The most popular Stoneville variety was Stoneville ST474 which accounted for 6.9 percent of the U.S. acreage.

Sure-Grow varieties were the fourth most popular planted in 1997. These varieties accounted for 7.4 percent of the U.S. acreage and accounted for 10.8 percent of the southeastern states planted acreage, 15.0 percent in the south central states and 3.3 percent in the western states. Sure-Grow 125 was their most popular variety and accounted for 4.4 percent of the U.S. acreage.

CPCSD (California Planting Cotton Seed Distributors) varieties were the next most popular and accounted for 5.5 percent of the U.S. acreage planted in

Transgenic varieties, genetically engineered varieties resistant to worms, herbicides or both, accounted for about 22.9 percent of the upland cotton planted in the United States in 1997.

Pima S-7 was the most popular American Pima variety planted in 1997. This variety accounted for 69.4 percent of the United States acreage and was the most popular variety planted in Arizona and California. Pima S-6 was the second most popular American Pima variety and accounted for 14.6 percent of the U.S. crop. Pima S-6 was the most popular variety planted in New Mexico and Texas. Germain's CH 252 accounted for 8.1 percent of the U.S. acreage and Conquistador accounted for 3.6 percent.

Estimates of the percentage of the various varieties of cotton planted in the United States for 1997 are based on informal surveys made by the Cotton Division Classing Offices. The variety data are based on estimates furnished by cotton ginners for the territories served by their gins, seed dealers, extension agents, and others.

Estimated percentage of upland cotton planted to leading specified varieties, by growth areas, 1997 crop
